## How do i connect my kamtron camera to wifi

KAMTRON IP network camera is a wireless security camera that keeps you in touch with your home anytime. It is set up quickly from mobile. It provides secure access to its live video stream which you can access from anywhere. You can live stream video via Smart Phone, PC app or tablet. It comes with a wide 62 Degree broad-angle view which covers every corner of your house. It has one Super IR LED installed for Night Vision and covers up to 20ft. You can remotely control the camera; rotate it easily with your fingers to watch every corner of your room with the help of the MIPC app. Kamtron supports Ethernet cable as well as WiFi connection. It has many other interesting features like an intelligent motion detector, two-way audio, record and playback video. Kamtron cameras have full HD video quality to give you crystal clear pictures. It also alerts you on the mobile app with snapshots and videos. You can immediately warn the concerned person. Go to the google play store/ Apple app store and download the MIPC Kamtron security camera app. You can also scan the QR code printed on the box to get the MIPC app. Sign up for a new account and enter all the useful data asked during signing up. Bind your email with the account so that you can retrieve the password in the future. Insert the SD card in the camera and connect it to the power supply. Wait until a "tick" sound comes from the camera. In case you can't hear it, connect it to the power supply again. Open the app and tap the plus (+) icon to add the camera. Select your device type and scan the QR code present at the bottom of the camera. Select the connection mode for your camera. Power on the camera and wait until the prompt tone is heard. This will take around 30 seconds. Hold the RESET button present at the back of the camera for 1 sec and release it. You will hear a sound and WiFi LED light flashes alternatively. Select your WiFi network, enter the password and tap NEXT. The device will start to connect to the camera. keep your phone close to the camera and wait till your device is connected to the camera. Now, change the camera password. You can also give a unique name to your camera. Add the time zone of your area and tap APPLY. Your camera is connected is to WiFi. Connect the Ethernet cable and power supply to the camera. Select the Ethernet connection in the application. Turn on the camera and wait until the IR lights turn off. You will hear a prompt tone. Tap NEXT and wait until the device is connected. Enter the camera's password and tap APPLY. Select the WiFi name from the list and enter the password. Now give a name to your camera. Add the time zone of your area and tap APPLY. Pull out the Ethernet cable. Your device will be offline for a short time. Now click on the live interface video appearing on the app. You can see your camera is connected to the device. Use your finger to control the moment of the camera. Q1. Can we record the video in Kamtron? How to enable record in Kamtron security cameras? Open the MIPC app and go to settings. Click on the record option Select the video mode for recording and tap APPLY. This problem may arise during the setup of the Kamtron camera. To connect it: Press the reset button present at the back of the camera for 10 seconds. You will hear the device sound" Restore to factory setting successfully". After few seconds you will again hear the Tick sound from the camera. Open the MIPC app and select your WiFi network, enter the password and tap NEXT. The device will start to connect to the camera. Keep your phone close to the camera and wait till your device is connected to the camera. Now, change the camera password. You can also give a unique name to your camera. Add the time zone of your area and tap APPLY. Your camera is connected is to WiFi. Yes, you download the MIPC app used for live video surveillance for Kamtron cameras on Android and iOS. Scan the QR code printed on the box or download the app from Google play store or Apple app store. Yes, you can choose the connection mode as a WiFi connection or an Ethernet connection. You can download the MIPC app on your PC and watch the live video streaming on it. To enable motion alert: Open the MIPC application and go to settings. Turn on Motion detection. Setup the rule for motion detection. You will be notified on your phone when any motion is detected by the camera. You will receive a video or snapshot according to your setup. Applies to: SP1/SP2/PD1/I21AZ/I21CF/I21B/I41CZ/I41CY/I41CR/I41CJ 1. Please plug the camera to a power source by adapter. 2. Please connect the camera to the router by ethernet cable. 3. Please search MIPC in apple store or google play and install it. You can also download it from link below. android APP (MIPC) support.annke.com/document/IPC/SP1/app/MIPC.apk APP (MIPC) APP (MIPC) guide in English support.annke.com/document/IPC/SP1/app/guide\_android.pdfiphone&iPad APP (MIPC) guide in English support.annke.com/document/IPC/SP1/app/guide\_ios.pdf 4. Run MIPC and register an account to login app. 2. Add camera by its ID at the bottom. 3. connect wifi. Now, you can unplug the ethernet cable and you can see live view on your phone app. Your camera may lose connection with our servers or the internet on some occasions. The camera is designed to automatically reconnect once there is internet available. If this does not happen, you can try the following: 1. Unplug the camera from the power source, and plug it back in. Wait up to 5 minutes for the camera to restart. If it does not reconnect, press the button one quicktime and let off. 2. If the camera is still offline, there may be a problem with your home network. You can reset your home router and/or modem. A) Power off the camera (unplug the camera, or hold the button down for 5 seconds until the lights turn off; press it to turn it back on after about minute.) B) Power off the Router C) Power off the Modem D) After 15 seconds power on the Modem (This allows all home devices to reconnect themselves) E) After 15 seconds power on the Router (This allows all home devices to reconnect themselves) F) After one minute power on the camera 3. If the camera is still offline, you can factory reset your camera. You will need to set up your camera once again, following the setup instructions in your quick-start guide, or one of the related detailed articles. 4. If you have followed all of these troubleshooting steps and LED light is still orange, it means that you do not have internet connection. Please ask your internet service provider for further assistance. © 1996-2014, Amazon.com, Inc. or its affiliates 2018-10-18 6970 Ip camera installation and configuration: wireless ip camera can bring a lot of fun, and it is necessary.Installation and configuration are very convenient,Just need to use mobile phones can help you pay attention to every move of your baby or pet.But the cloud IP camera configuration could be confusing to many Anyone new to us could ip camera have many questions like:ip camera how to install ? how do i connect to my ip camera? how to setup ip camera recording?Follow this Cloud IP camera installation and configuration, and you'll get answers to all questions concerning the IP camera configuration and start video monitoring at once!1.Install cloud ip camera "MIPC" APPa. Sold by Groupon Goods. View the FAQ to learn more. August 25, 2020We love this Camera @ Software to pieces. On live feed we can snap a picture & save it to iPhone. On 6 second recorded snapshot sent to phone, audible & moving can be saved to iPhone, you can purchase a memory card anywhere from 32 GB to 500 GB which pictures, movies & live feeds are saved as well as iCloud saving for backup. If need be, we can speak to whoever would intrude or be at door. We mounted one camera at front door under porch awning; just above door so we can converse with who comes to door without opening. If we desire, we can turn off Motion Tracking & position camera at whatever degree, we want. Camera is not waterproof so be sure you have a porch or awning you can place it under. Camera is meant for inside use. Camera also has on/off for baby cry. We can arm camera as "Home Away" & get Audible & 6 second Motion/Tracking notification. As said before, we love all its features.Written by a Mighty Rock customer.Helpful?August 4, 2020I bought this camera for my cat, my cat is getting old, and I can't stay with her all the time, when I am at work, I want to know how she's doing, if she has emergency situation, I can see through the camera. The quality is very clear, and I can talk to my cat because there has speaker. Love this product.Written by a Mighty Rock customer.Helpful?August 5, 2020Recently went on a short trip and got this camera to watch my cat. She stays in a bedroom and has a perch at each window. I had family come every day to feed her wet food and clean litter but it was nice to be able to check in on her myself. The only thing was when I spoke to her through the camera via the phone, she got very anxious and cried/meowed because she couldn't figure out where I was. So after that, I just checked in on her. It has a good range-up & down and to the side. I didn't mount on wall. I just sit on a piece of tall furniture. The night vision I thought was a little odd. It goes from a grayed out look to a regular look but I could still see her. Only a few times I couldn't if she was in a certain corner or under bed. It kind of makes a slight movement sound when I remotely adjusted camera which would get her attention and come out from under the bed but didn't seem to cause anxiety. Yes, I would buy again. Very pleased. I've had about 2 weeks.Written by a Mighty Rock customer.Helpful?October 6, 2020For the price, these cannot be beat! I have one that I connected straight to my monitor so I can keep an eye out on the front yard. It has been great! The night vision is fantastic and the picture is crystal clear whether in day or night. highly recommended!Written by a Mighty Rock customer.Helpful?September 2, 2020I love this camera! I had someone try to break into my apartment a while back so I decided to put this in the window of my apartment facing my front door. I can see perfectly through the screen and the night vision works great. I was also very surprised at the sensitivity level for the motion detection. It has 3 different settings and the most sensitive will actually catch motions 40-50 feet away. I also love the 360 feature as I can turn it with my phone and observe my puppy while I'm at work and if he's doing something he's not supposed to be doing, I can use the two-way audio to tell him to knock it off. They also have great plans for recording/ saving which are 7, 15, and 30 days, which would come in handy if a person breaks into your home. And since everything is backed up to a cloud storage, there's nothing the intruder can do to erase/destroy the recordings. However, if you don't want to pay for storage plans each month, it also has an SD card slot. It truly is a great little camera.Written by a Mighty Rock customer.Helpful?August 3, 2020This is a great camera, I put it in the baby's bedroom and it will alert when it detects movement or abnormal sounds so I can do housework while the baby is sleeping without worrying that I won't hear the baby Crying. It also has two-way communication so the father can see the baby and talk to me during lunch break.Written by a Mighty Rock customer.Helpful?August 6, 2020I love this camera! It does everything we wanted it to. Grandpa is in assisted living and we can watch him day and night. We can even talk to him and remind him to stay in bed or tell him that will be late for a visit. Sometimes the sound that I hear on my smartphone is not the greatest quality but what he hears in his room is perfect. I love that we can watch him and I love that the staff know that we can be watching them day or night. One feature that I wish was different is that that app cannot be open with any others on my phone. I've thought about having a separate phone just as the monitor for the camera. It is worth every penny!! I bought my second one just today!!Written by a Mighty Rock customer.Helpful?October 10, 2020I own ANNKE security system. I was a little hesitant to but this brand since all my cameras are ANNKE. I must say I'm glad I bought this camera. It has a wide angle and a very good quality picture. Only thing about dome cameras is, it limits you on where to install the camera.Update: Camera Soo good I bought a second one for my backyard.Written by a Mighty Rock customer.Helpful?September 10, 2020These are all metal housing construction, for a 10 buck camera it's pretty darn good. Excellent clarity, pretty decent at night as well. If you just want basic camera functions don't waste money on anything else, these are awesome. It should be noted, the box comes with camera only, ready to plug and play. If you need wiring that is a separate purchase.Written by a Mighty Rock customer.Helpful?August 5, 2020The camera is decent but the app needs work. It will move from Favorite position and cause you to miss a door or window that is critical. It does this one every day or two so you have to manually align it all the time. Mine never get touched but they will rotate and will set themselves in different spots. The software should be smart enough to figure out major objects in the favorite frame and always maintain that. So even if they were moved physically by an inch, for example, it should reset back at the point you saved. Another issue is the time stamp is off by hours on the card if you try to download videos. Not a bad camera for price but software and the ability to track is also very slow. I had a window washer walk by the camera. It followed for a few feet then stopped (somehow lost them) then it stayed just off frame. I never got video of that person leaving or cleaning any other windows. So basically it completely failed its main job of security. Also alerts are not working correctly. I have been complaining since I bought this. I have a case that is months old and they can't figure it out. For example it will show alerts delayed by hours every day. I just got a cluster of them at 11 pm that are timestamps of 3 pm in the Android app.Written by a Mighty Rock customer.Helpful?
